<p>Garden Detectives 3/29 & 4/5</p>	<p>Soda Bottle Science 3/30 & 4/6</p>	<p>Music 3/31 & 4/7</p>	<p>Fire Safety 4/1 & 4/8</p>	<p>Taste of Space 4/2 & 4/9</p>
<p>The kids are solving the mystery of the mixed up seeds! Counting, sorting, and using their memories they'll be analyzing seeds and making their own packets. Math in the garden has never been so much fun. The day will finish with a beautiful take home terrarium!</p>	<p>Our sleuths will be investigating nucleation sites and how degassing dissolved carbon dioxide results in a fun geyser fountain show. They'll also figure out how to make raisins dance, how cyclones work and a few other soda bottle experiments.</p>	<p>First they'll experience music first hand with a variety of visiting musicians that will both delight and inspire them with their instruments. Then each child will make their very own drum and a wind chime masterpiece made out of simple found items.</p>	<p>What is fire? A lesson on what fire is as well as lots of important fire safety basics for kids. They'll learn by example and play games to reinforce what they've learned. A special guest visit from a local ambulance and making their very own Sparky the fire dog sock puppet will complete the experience!</p>	<p>We'll be doing some gravity experiments, stomp rockets and a solar system model on our special taste of space day! In addition they are going to test their ability to drink water in space and sample some real astronaut cuisine! It's an out of this world experience!</p>
<p>Come Fly With Us 3/29 & 4/5</p>	<p>Sportsology Sampler 3/30 & 4/6</p>	<p>Smash, Crash Launch... 3/31 & 4/7</p>	<p>Fine Art with Deanna 4/1 & 4/8</p>	<p>Tutti Fruity 4/2 & 4/9</p>
<p>This camp is all about flight! We'll be designing paper airplanes and hovercraft toys as well understanding how helicopters work. We'll have our very own paper airplane contest to test a variety of designs!</p>	<p>Our very own Joey will be leading an exciting day of physical activity with things like mini-golf, outdoor games and skate board science. They'll also be creating their own recycled skateboard project to take home.</p>	<p>We'll be exploring the science of toys on this special hands on science day. We'll break out the blue track while we learn about forward and backward motion as well as inertia. Kids will investigate the science behind some of their favorite toys!</p>	<p>Our resident artist Deanna will be exploring different techniques with the kids as they create several beautiful masterpieces to take home. They'll make their very own gorgeous hand-painted vegetable bouquet as well as a creation that teaches them about layering and textures.</p>	<p>Our nutrition investigation will focus on healthy fruits. We'll be making our own fruit leather and smoothies showing the kids each step of the way how to be involved in the kitchen and make things they'll love!</p>
